Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group II (methods of treating skin lesions) in the reply filed on 3-6-09 is acknowledged.

Claims 1-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3-6-09.

In a telephonic conversation with Ted Ringsred on 5/21/09, Examiner noted that the restriction requirement should have listed claims 1-27 in Group I and claims 29-30 in Group II. Confirmation was made that election of Group II was desired.

Claim Objections

Claims 29-30 objected to because of the following informalities: the acronym IRM should be replaced with "immune response modifier". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 29-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Wallner et al. USPN 6890904 ("Wallner").

Wallner disclose a method of treating skin lesions (c11:37-65) comprising the steps of administering an IRM compound and subjecting the lesion to an ablation procedure such as excision or radiotherapy (c16:32-c17:25). The limitation "for a period of time and in an amount sufficient to permit visualization" is inherently met because Wallner describe an "amount" consistent with Applicant's description in the specification, and the the ablation procedure may take place after a period of time following administration of the compound.
